Statement of Achievement

PCAP: Programming Essentials in Python

During the Cisco Networking Academy® course, administered by the undersigned instructor, the student has studied the following skills:

- the universal concepts of computer programming (i.e. variables, flow control, data structures, algorithms, conditional execution, loops, functions, etc.)

- developer tools and the runtime environment;

- the syntax and semantics of the Python language;

- the fundamentals of object-oriented programming and the way they are adopted in Python;

- the means by which to resolve typical implementation problems;

- the writing of Python programs using standard language infrastructure;

- fundamental programming techniques, best practices, customs and vocabulary, including the most common library functions in Python 3.

This Statement of Achievement acknowledges that during the course PCAP: Programming Essentials in Python, the student has been able to accomplish coding tasks related to the basics of programming, and understands the programming techniques, customs and vocabulary used in the Python language.

By completing the course, the student is now ready to attempt the qualification PCAP – Certified Associate in Python Programming certification, from the OpenEDG Python Institute.

Certificate of Completion

Presented to:

César Alonso Fallas Gamboa

Name

For completing the Cisco Networking Academy® Mobility Fundamentals course, and demonstrating the ability to do the following:

- Explain the needs, aspects and technical benefits of wireless technologies
- Explain Wireless LAN standards, components, operation and plan a deployment
- Configure Wireless LAN access point, router and client

- Set up a home network
- Explain Wireless LAN security – threats, vulnerabilities, protocols and mitigation technologies
- Understand how to troubleshoot Wireless LANs
- Explain Bring Your Own Device – benefits, challenges, design and solution
